

CleanBC Go Electric EV Charger Rebate Program

REBATES FOR HOME AND WORKPLACE CHARGING

Increased rebate offers are available for B.C. Indigenous communities, businesses, and individuals to purchase and install eligible Level 2 charging stations (funding is available on a first-come first served basis while funding lasts):

- Single Family Home Rebate: Up to 75% of project costs to a maximum of \$750. Individual residents are eligible to apply for rebates at their primary residence.
- Multi-Unit Residential Building rebate: Up to 75% of project costs to a maximum of \$4,500 per charger.
- Workplace rebate: Up to 75% of project costs to a maximum of \$4,000 per charger.

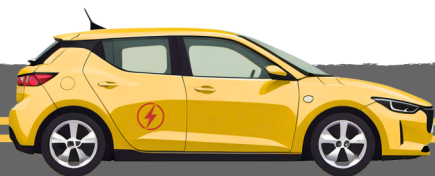

EV READY REBATES

EV Ready rebates are also available for strata corporations, building owners and co-operative boards to support multi-unit residential buildings future proof their buildings on a first-come first-served basis while funding lasts:

- EV Ready plan rebate: Up to 75% of project costs, to a maximum of \$3,000, to develop an EV Ready plan, which is a building specific strategy that provides a minimum of one electrified parking stall per resident.
- EV Ready infrastructure rebate: Up to 50% of the electrical infrastructure and installation costs as recommended in the EV Ready plan, to a maximum of \$600 per parking stall with a project maximum of \$120,000.

HELP ALONG THE WAY

Plug In BC offers up to five hours of free planning assistance from an EV charging advisor, who can help guide you through the process of setting up EV charging stations at your building.

- This service is available to prospective applicants from multi-unit residential buildings and workplaces
- To learn more, visit pluginbc.ca/ev-advisor-service
- To contact an EV Charging Advisor, email evadvisor@pluginbc.ca

EV REBATES

BC Hydro and FortisBC administer the rebates on behalf of the Province. Visit your electricity provider's website for more information and to apply:

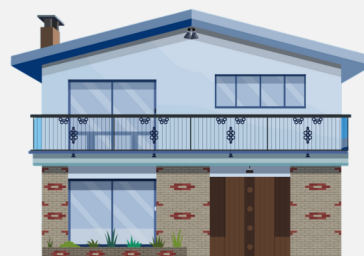

www.bchydro.com/evcharger

www.fortisbc.com/ev

Rebates for Level 2 chargers at single family homes and for EV Ready plans are post purchase. For all other rebates, you must apply for pre-approval before making any purchases or starting any work.
